FOUR POST LIFT

GEA

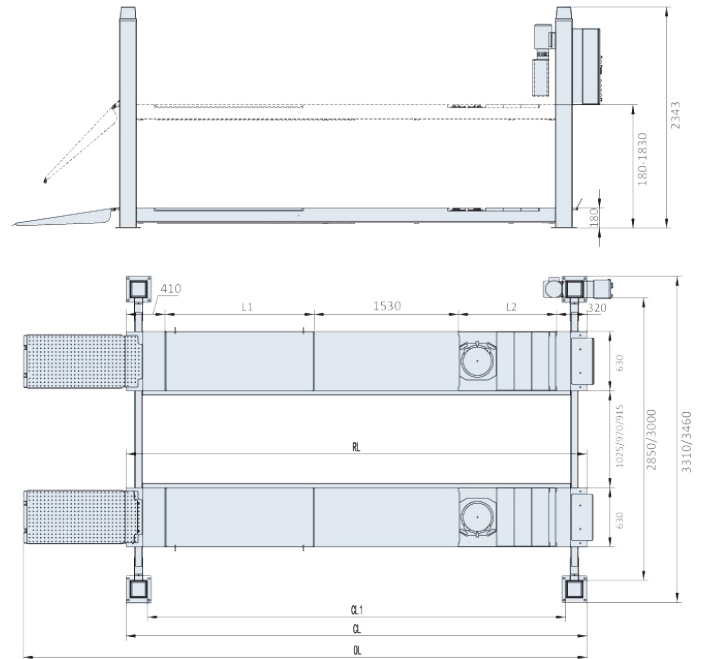

TECHNIQUE

FOUR POST LIFTS

The Technique range of four post lifts feature a state of the art flow-control hydraulic system complete with reliable mechanical safety locking providing a secure and smooth transition during operation. Low profile run on ramps provide convenient drive on and off access to the lift without impacting on the space around you making it ideal for workshops where every inch counts.

- CE approved equipment.
- 4000kg and 5000kg lifting capacities.
- 4.8m and 5.7m platform lengths.
- Solid and robust cable pulleys.
- Reliable mechanical safety locking system.
- Flow-control technique hydraulic system.
- 24v safety control voltage.
- Low profile runway is convenient for driving on and off and less demanding on space.
- Max height switch limits the travel of runways and ensures cylinders work within the stroke.
- Reliable electrical release for easy and efficient use.
- Compact quick plug electrical connection saves up to more than 70% time on wire connection.

Motor housing.

Oil hose protection.

Rear alignment slip plates.

Play detector.

Wireless LED torch controlling play detector system.

Recessed front bearing mounted turn plates.

Model	MOT Class	Capacity	Lifting Height	L1	L2	RL	CL1	CL	OL
